## **CAREER OPPORTUNITY**

Newmont is the world's leading gold company and a producer of copper, silver, zinc and lead. The Company's world-class portfolio of assets, prospects and talent is anchored in favorable mining jurisdictions in North America, South America, Australia and Africa. Newmont is the only gold producer listed in the S&P 500 Index and is widely recognized for its principled environmental, social and governance practices. The Company is an industry leader in value creation, supported by robust safety standards, superior execution and technical proficiency. Newmont was founded in 1921 and has been publicly traded since 1925.

### **Safety Training Lead**

**Borden Mine – Chapleau, ON**

#### **Dimensions**

They will be reporting to the Senior Safety Superintendent.

#### **Purpose**

Support operation by coordinating the Safety, Health and Training guidance to all employees in all departments. Promote, coordinate and implement activities to improve and maintain high levels of safety and Training performance. Act as a resource for all of the workplace parties and an advocate of the Internal Responsibility System (IRS).

#### **Safety & Sustainability Expectations**

- Conduct site inspections and assist with accident investigations.
- Audit the workplace, identify hazards and make recommendations to reduce exposure to the workforce
- Provide or coordinate safety training (Common core, Specialties etc)
- Coordinate and monitor activities relating to FRM, Live Work and other Health/Safety and Training related programs / activities.
- Coordinate Emergency Response planning and training.
- Promote and adhere to Newmont policies
- Develop and maintain good relationships with local stakeholder groups

#### **Essential Duties**

##### **Prevention**

- Oversee the inherent programs i.e. 5 Pt. Safety System, Safety Meetings, etc.
- Support development and reviewing job procedures
- Monitor the functioning of the IRS and make recommendations for its improvement.
- Regularly audit or arrange for the audit of the elements of the health and safety system, and to suggest ways of improving them.
- Regularly audit and inspect the operation for compliance with the Act, Regulations and company policies / procedures.

- Report to Safety/Training and Security Manager, General Foreperson, Frontline Supervisors, and Contractors on the safety and health status of the operation. Conduct monthly Supervisor safety meetings and provide updates on the departmental activities.
- Advise workers, supervisors and management personnel on technical safety & health matters.
- Act as a resource for all employees and the JH&SC.
- Advise trainers on the safety and health content of training courses.
- Liaise with other operations, WSN and similar resources to obtain up-to-date information on safety and health issues for the operation and the JH&SC.
- Provide management with statistical reports.
- Participate in the JH&SC either as a member or a resource
- Attend crew safety meetings on a selective basis either as an observer or presenter.
- Supervise and support the medical support system with preventative programs and WSIB issues.

### **Safety Training**

- Educate all levels of the organization about the IRS, and to actively promote it.
- Assist the trainers in their duties and audit to ensure high quality and compliant training
- Ensure that all Trainers have received training on the material that they are presenting, received a Train-the-Trainer course and familiar with the Act & Regulations pertinent to the job in which they are instructing
- Ensure that the Common Core training programs are structured to ensure that employees and contractors have received training or are being trained on the equipment that they are expected to operate.
- Where applicable, the training will be structured to ensure that employees and contractors have received the appropriate specialty accreditation in the job that they are performing or are currently in the process of being trained or accredited.
- Conduct Supervisory training courses and/or schedule through other providers, particularly those related to the Supervisory Common Core Program
- Oversee the following programs: Underground Service Miner Common Core, Underground Basic Common Core, Underground Mining Specialties, Underground Supervisory Common Core, Surface Supervisory Training Program. Ensure compliance with record keeping.
- Ensure that the Borden site induction training programs are administered to all new employees, contractors and visitors.

### **Emergency Preparedness**

- Support all departments in developing and implementing emergency procedures.
- Maintain underground Mine Rescue program
- Ensure an adequately trained compliment of Underground Mine Rescue personnel
- Schedule Emergency Preparedness training for Management personnel ie. Management Mine Rescue Course
- Promote First Aid Training and ensure that instructors are available to conduct training.

- Liaise with emergency preparedness groups i.e. Ontario Mine Rescue, Municipal Fire departments, Emergency Equipment Suppliers etc.
- Monitor and update the emergency preparedness program as necessary.

### **Training & Experience**

- Minimum grade 12, technical diploma preferred.
- A Valid Driver's License
- Good understanding and working knowledge of the Occupational Health & Safety Act and Regulations for Mines & Mining Plants, surface and underground mine rescue training, WHMIS and Loss Control techniques.
- Accreditation in the Underground Supervisory Common Core.
- Minimum 5 years experience in underground operations.
- Minimum of 5 years experience in Occupational Health and Safety Systems Management.
- Familiarity with the various Common Core programs that are administered through the Ministry of Colleges and Universities.
- Minimum 3 years experience in leadership roles
- Strong leadership, organizational, communication and interpersonal skills
- Good understanding and working knowledge of the Occupational Health and Safety Act, surface and underground mine rescue training, WHMIS and Loss Control techniques.
- Ability to plan and schedule programs and activities.
- Demonstrate good problem solving skills.
- Work well in a team atmosphere.

### **Working Conditions**

- This position is located at Borden, part of Newmont's Porcupine mine site near Chapleau, ON.
- In this role, you will work a 4x3 schedule. As such, if you do not live near the site, we will require relocation.

### **How to Apply**

Please send a copy of your resume to [FNBordenGoldHR@newmont.com](mailto:FNBordenGoldHR@newmont.com) and include Requisition ID 17445 in the subject line. [Optional] Please identify which community you associate with. The deadline to apply is **August 25, 2021**. As an equal opportunity employer, Newmont is committed to diversity, inclusion, and accessibility. We encourage all qualified candidates to apply. Accommodations are available on request for candidates taking part in all aspects of the selection process. All properties owned by Porcupine Operations are now Tobacco-Free. This includes but is not limited to all buildings, parking lots, vehicles, the surrounding wooded area, roadways, tailings, rehabilitated sites, etc.

## **CAREER OPPORTUNITY**

Newmont is the world's leading gold company and a producer of copper, silver, zinc and lead. The Company's world-class portfolio of assets, prospects and talent is anchored in favorable mining jurisdictions in North America, South America, Australia and Africa. Newmont is the only gold producer listed in the S&P 500 Index and is widely recognized for its principled environmental, social and governance practices. The Company is an industry leader in value creation, supported by robust safety standards, superior execution and technical proficiency. Newmont was founded in 1921 and has been publicly traded since 1925.

### **Senior Geotechnical Engineer**

**Borden Mine – Chapleau, ON**

#### **Dimensions**

This position supervises other members of the geotechnical team at Borden Mine and reports to the Porcupine Geotechnical Superintendent.

#### **Purpose**

- To use historical performance, industry best practice prediction tools and analysis as well as instrumentation to advise technical team on geotechnical risk mitigation measures for development and longhole stoping.
- To educate the operations workforce in geotechnical risk identification.
- To improve communication of geotechnical-related items through clear and concise engineering prints, meaningful contributions to meetings and positive collaborations with the workforce.
- To direct reports in the engineering group through performance review, training, guidance, and mentoring to reach their maximum potential.

#### **Essential Duties**

##### **Promoting Safety and Sustainability**

- Be familiar with the site Ground Control Management Plan and ensure that Mine Operations are adhering to the guidance and requirements outlined in it.
- Perform inspections of underground workings as well as utilize information provided by the instrumentation systems to proactively assess ground control risk and ensure ground support systems are adequate to mitigate geotechnical risk to workers.
- Contribute to the mine planning process by conducting analysis and providing recommendations pertaining to stope stability by using numerical modeling techniques (Map3D, RS2) and empirical design charts to predict stope performance, including Mathew's Stability number and ELOS.
- Perform quality control audits of ground support materials and installations, including assessments such as pull tests, torque tests, shotcrete strength tests, etc., to verify effectiveness of ground support.
- Review long hole master prints to ensure blast plan supports stope stability risk mitigation measures.

- Reconcile actual volumetric stope stability performance with predicted and/or modeled stope performance. Use information to refine site specific Stability and ELOS graphs and convey performance trends to long-range and mid-term planners.
- Carry out daily management tasks to ensure quality backfilling of workings, including developing fill plans for individual stopes and preparing appropriate backfill prints.
- Address geotechnical issues documented in the ground control logbook as appropriate.
- Review of other engineering prints to ensure geotechnical risk/hazards are identified and ground support outlined is appropriate for the local ground conditions.
- Design rehabilitation and cable prints using Deswik, outlining site specific ground support installations.
- Participate in weekly planning meetings and pre-site inspections to provide geotechnical input; specifically advise on geotechnical risk considerations and mitigation measures.
- Assist in providing geotechnical hazard identification training to workforce.
- Support communication initiatives to inform the workforce of geotechnical activities.
- Participate in other geotechnical-related tasks outlined by the Geotechnical Superintendent

### **Training & Experience**

- Bachelor of Science in Mining or Geotechnical Engineering or equivalent
- Be a registered Professional Engineer in a Canadian jurisdiction.
- Have a minimum of 5 years working in rock mechanics or at an underground mining operation.
- Have previous experience in a supervisory role.
- Familiarity with Deswik, Map3D, RS2 and Unwedge would be considered an asset

### **Working Conditions**

- This position is located at Borden, part of Newmont's Porcupine mine site near Chapleau, ON.
- In this role, you will work a 4x3 schedule. As such, if you do not live in the area, we will require relocation

### **How to Apply**

Please send a copy of your resume to [FNBordenGoldHR@newmont.com](mailto:FNBordenGoldHR@newmont.com) and include Requisition ID 17223 in the subject line. [Optional] Please identify which community you associate with. The deadline to apply is **August 25, 2021**. As an equal opportunity employer, Newmont is committed to diversity, inclusion, and accessibility. We encourage all qualified candidates to apply. Accommodations are available on request for candidates taking part in all aspects of the selection process. All properties owned by Porcupine Operations are now Tobacco-Free. This includes but is not limited to all buildings, parking lots, vehicles, the surrounding wooded area, roadways, tailings, rehabilitated sites, etc.
